- Title タイトル: PharmD PhD MPH FRSM
- Full name 氏名: Ivo Vojtek
- Short bio (or link to your webpage)

Ivo Vojtek, Head of Vaccines and Infectious Disease Medical Affairs at GSK Japan is a pharmacist and a microbiologist by education and a public health expert by heart. After completing his PhD dedicated to horizontal gene transfer and signaling pathways involved in infection of Group A Streptococcus the lab of Emmanuelle Charpentier, he has been driven to finding new ways to improve patients' lives through accelerating access to innovative medicines and vaccines. Japanese by marriage, Ivo is currently based in Tokyo where he is in charge of developing medical and clinical strategies to bring new vaccines and antimicrobials to all members of Japanese communities. This includes fostering external partnerships, medical education, data generation activities such as cost effectiveness, burden of disease and strengthening disease surveillance systems besides improving vaccine confidence. Ivo is passionate about kyudo, skiing, diving and video games.
